

Math 180 - Mr. Hair

1. In order to keep your “math brains” in working order, we are asking you to continue with both your Math 180 workbooks and the online Math 180 program. Just like we do in our classroom, you are expected to work at your own pace for 25 minutes in both the textbook and online program.
2. This is a great opportunity for you all to work without any interruptions/disruptions and really focus on the assignments. You have all done great work so far this year and I’m proud of your accomplishments. Let’s keep the momentum going!!
3. I am going to set up a class page in the **Remind** app. Once you download that and are added to the Math 180 class, you can contact me with any questions while you’re working through your assignments.

Math 180 Textbooks

1. Most of you do not have these in your possession as of yet. I or a school representative will be dropping the textbooks off at one of the district-wide school breakfast/lunch distribution sites. You can pick them up there.
2. Once you have the textbook, you will recall that the assignments I give in class are two pages. For example, I would give you a class assignment of pages 102 & 103. Please proceed the same way.
3. I took a photo of the whiteboard in our classroom and the following would be good starting points for each of you:
 - Oliver - pp 134-135
 - Albert - pp 118-119
 - Ivan - pp 118-119
 - Mathew - pp 130 - 131
 - Evelyn - pp 132 - 133
4. I would also ask that you go back to your books to see if there are any previous pages that need to be completed.

Math 180 - Chromebooks

1. Continue working on your Math 180 online program. You can logon at home through Clever or from the Britton website as we do in class.
2. If you have questions you can reach out to me via email: hairb@nhusd.org or through the Remind app. This is a good tool to talk about while we're away from each other. Please download that app

So in conclusion, I encourage all of you to continue with your Math studies in the same manner as you would if we were in school.

- Get yourself into a good routine.
- Start and end your daily Math session at the same time as if we were on the Britton Campus (10:04 - 10:59).
- Split your time between your textbook and Chromebook, just like we do in class.
- Reach out to me for any help or questions you have along the way.

Remember, you can do this!!
